MGT 202: CHAPTER 3 GROUP ACTIVITY 1& RUBRIC

BUSINESS PROBLEM IDENTIFICATION FRAMEWORK

SECTION 1: STUDENT ACTIVITY HANDOUT

Course: MGT 202 - LEC 1 (Prepared by G.N Setlhoko) | **Group Size**: Established groups of 8 students
Submission Format: 5-Slide PowerPoint Presentation | **Nature**: Formative Group Problem-Solving Activity

> **Activity Purpose**
> To guide student teams in identifying, defining, and qualifying a specific local customer problem in Botswana that could provide the foundation for a small business opportunity.
> Note: Full business plans, detailed financial calculations, Business Model Canvases, and competitor analyses are strictly prohibited.

5-Part Group Activity Framework

Framework Part	Activity Requirements & Guidelines
1. Identified Problem & 4U Framework	Identify 3 everyday problems in Botswana across key sectors (transport, agriculture, water/energy, student services, retail, housing, health, waste management, digital). Select 1 primary problem and evaluate it using the 4U Framework: Unworkable, Unavoidable, Urgent, and Underserved.
2. Customer Segment (MVS)	Isolate a narrow Minimum Viable Segment (MVS) sharing identical needs. Do NOT use generic terms ('everyone', 'students', 'businesses'). Profile across 5 parameters: Location, Occupation/Role, Relevant Behavior, Problem Situation, and Common Need.
3. Problem Evidence	Gather direct market feedback, qualitative quotes, or observational evidence from prospective MVS customers to validate the severity of the 4Us and highlight critical evidence gaps.
4. Customer Problem Statement	Draft a clear, structured problem statement using the formula: [**Specific customer group**] experiences [**specific problem**] when [**situation**], resulting in [**consequence**]. Ensure logical cause-and-effect reasoning.
5. Problem Qualification (BLAC & White Space)	Qualify the problem within the BLAC Framework (Blatant, Latent, Aspirational, Critical) and identify the market White Space - the open, underserved area for unique business positioning.

5-Slide Presentation Mapping

Slide #	Required Content Mapping
Slide 1	3 Identified Botswana Problems.
Slide 2	Selected Customer Group / Minimum Viable Segment (MVS) Profile across all 5 parameters.
Slide 3	Customer Problem Evidence & 4U Analysis (Unworkable, Unavoidable, Urgent, Underserved).
Slide 4	Structured Customer Problem Statement (using the standard formula).
Slide 5	**Problem Qualification** (BLAC Quadrant & White Space Opportunity) + **Proposed Business Idea Statement.**

SECTION 2: COMPREHENSIVE 50-MARK GRADING RUBRIC

Detailed Assessment Matrix for MGT 202 Chapter 3 Group Presentations (10 Marks per Part)

1. Identified Problem & Definition (incorporating 4U Framework) - 10 Marks

Performance Level	Marks	Evaluation Criteria
Excellent	8 – 10	Identifies a relevant Botswana problem across key sectors. Thoroughly defines the context/root cause and rigorously applies the 4U Framework (Unworkable, Unavoidable, Urgent, Underserved) with clear explanations and examples.
Satisfactory	5 – 7	Identifies a relevant problem and mentions the 4U framework, but explanations or examples for 1–2 U's are superficial or lack clear local context.
Needs Improvement	1 – 4	Problem definition is vague, generic, or jumps directly to a solution without evaluating the problem's root causes or 4U criteria.
Unattempted	0	No problem identified or defined.

2. Customer Segment: Who Experiences the Problem? (MVS Profile) - 10 Marks

Performance Level	Marks	Evaluation Criteria
Excellent	8 – 10	Tightly defines a Minimum Viable Segment (MVS) sharing identical needs. Explicitly avoids generic terms ('everyone', 'students') and provides specific detail across all 5 parameters (location, role, behavior, situation, need).
Satisfactory	5 – 7	Defines a customer group, but relies on broader definitions or omits 1–2 descriptive profiling parameters.
Needs Improvement	1 – 4	Uses prohibited generic labels ('everyone', 'businesses') or fails to profile customer characteristics.
Unattempted	0	No customer segment identified.

3. Problem Evidence: What Did Potential Customers Say? - 10 Marks

Performance Level	Marks	Evaluation Criteria
Excellent	8 – 10	Presents clear primary evidence or qualitative quotes from prospective MVS customers validating problem severity (4Us) and transparently highlights remaining evidence gaps.
Satisfactory	5 – 7	Includes basic customer feedback or 4U observations, but lacks direct quotes or fails to identify missing data gaps.
Needs Improvement	1 – 4	Relies entirely on unverified group assumptions with zero customer evidence or quote verification.
Unattempted	0	No customer evidence presented.

4. Customer Problem Statement - 10 Marks

Performance Level	Marks	Evaluation Criteria
Excellent	8 – 10	Strictly adheres to the required formula: [Specific customer group] experiences [specific problem] when [situation], resulting in [consequence].

		Demonstrates flawless cause-and-effect logic.
Satisfactory	5 – 7	Follows the general formula, but the situation or consequence is vague or loosely connected.
Needs Improvement	1 – 4	Deviates from the formula structure, fails to show clear consequences, or copies provided course examples.
Unattempted	0	No problem statement formulated.

5. Problem Qualification: BLAC Classification & White Space 10 - Marks

Performance Level	Marks	Evaluation Criteria
Excellent	8 – 10	Accurately categorizes the problem within the BLAC Framework (Blatant, Latent, Aspirational, Critical), provides strong justification, and clearly defines an unaddressed market White Space.
Satisfactory	5 – 7	Mentions BLAC classification and white space, but rationale for the chosen quadrant or white space opportunity is weak.
Needs Improvement	1 – 4	Misinterprets BLAC framework quadrants or fails to identify an open market white space.
Unattempted	0	No qualification or white space analysis.

Summary Grade Marking Sheet

Evaluation Part	Max Marks	Awarded Marks	Marker Feedback & Observations
Part 1: Problem Identification & Selection	10		
Part 2: Customer Identification & MVS Profile	10		
Part 3: Customer Problem Statement Formula	10		
Part 4: 4U Evaluation & Customer Evidence Gaps	10		
Part 5: Business Idea & Qualification (BLAC & White Space)	10		
TOTAL SCORE	**50**
