

CSI213 Discrete Structures II

Dr. E. Thuma

Office: 232/225

Ext: 2131

E-mail: thumae@ub.ac.bw

Semester I 2025/26

Course Outline

Objectives: learn basic concepts and principles of probability. Apply these concepts to problems.

Topics will include but not limited to the following:

- Counting – permutations and combinations
- Introduction to Probability
- Conditional probability
- Independence, reliability
- Distributions – geometric, binomial, Poisson, exponential, normal, hypergeometric etc
- Regression analysis

Assessment

- CA: 5 Quizzes (2% each), 2 Tests (20% each): (50%)
- Final Exam: (50%)
- **Schedule:** MF(9:00 – 10:00) @
240/014, W(8:00:9:00) @235/003
- **Class Material:** prescribed text book, lecture notes.
